

THE POWER OF MUSHROOMS

Mushrooms carry more power than meets the eye. At South Mill Champs, we shine a light on what's been hidden in the soil, because once you know, you'll never look at mushrooms the same way again. Join the mushroom movement and help redefine what's possible in food.

THE POWER TO NOURISH

Mushrooms are a natural powerhouse of nutrition, Vitamin D, and antioxidants such as Ergothione and Glutathione, while adding rich flavor, remarkable versatility, and culinary curiosity to every bite.

The SMC Difference:

An expansive, nourishing portfolio spanning daily favorites to breakthrough synergistic ingredients.

THE POWER TO INNOVATE

Mushrooms embody modern innovation, adapting with precision and efficiency and sparking new approaches to cultivation, technology, and product development.

The SMC Difference:

Innovation powered by automation, state-of-the-art technology facilities, and new products.

THE POWER TO DELIGHT

The power of mushrooms is revealed at their freshest, sparking joy, connection, and trust beyond the table.

The SMC Difference:

We share that delight through our obsession with dependable quality, surety of supply, and lasting partnerships.

THE POWER TO REGENERATE

Mushrooms are natural regenerators, thriving on recycled resources and returning them as nutrient-rich compost that restores soil health, conserves water, and sustains future growth.

The SMC Difference:

Our compost mastery and closed-loop farming drive industry-leading productivity year-round with a responsible environmental footprint.

LEARN MORE ABOUT OUR NEW PACKAGING

Flow-wrapped bamboo tills for a more sustainable future

Our new packaging system features flow wrap made from BOPP (Biaxially Oriented Polypropylene) film and bamboo tills, offering several advantages over traditional plastic mushroom tills.

- ✓ BOPP film perforation allows for natural evaporation, preventing discoloration from condensation due to excess moisture.
- ✓ Flow wrap technology minimizes material waste as the film is precisely cut to fit each product.
- ✓ Bamboo tills are 100% plastic-free, made from fiber/paper materials.
- ✓ The tills are recyclable, naturally heat-resistant, and absorb minimal moisture.
- ✓ No chemical coatings are currently used on the bamboo tills.

This initiative is a crucial step for South Mill Champs, as we focus on nourishing responsibly by finding packaging solutions that move away from heavy plastics. That's the power of innovation!
